

The Royal Mail Defined Contribution Plan

Statement of Investment Principles

Royal Mail Defined Contribution Plan DC Statement of Investment Principles

1. Introduction

This Statement of Investment Principles ("SIP") sets out the policy of the Trustees of the Royal Mail Defined Contribution Plan (the "Trustees") on various matters governing decisions about the investments of the Royal Mail Defined Contribution ("DC") Plan (the "Plan"). This SIP replaces the previous SIP dated 29 June 2023.

The SIP is designed to meet the requirements of Section 35 (as amended) of the Pensions Act 1995 ("the Act"), the Occupational Pension Schemes (Investment) Regulations 2005, and the Occupational Pension Schemes (Charges and Governance) Regulations 2015. The SIP also reflects the Trustees' response to the Myners' voluntary code of investment principles.

This SIP has been prepared after obtaining and considering written professional advice from LCP, the Plan's investment consultant, whom the Trustees believe to be suitably qualified and experienced to provide such advice. The advice considers the suitability of investments and the need for diversification, given the circumstances of the Plan and the principles contained in this SIP. The Trustees have consulted with the relevant employer in producing this SIP.

The Trustees will review this SIP from time to time and, with the help of their advisers, will amend it as appropriate. These reviews will take place as soon as practicable after any significant change in investment policy, and at least once every three years.

Appendix 1 contains brief details of the respective responsibilities of the Trustees, investment advisers and investment managers. It also contains a description of the basis of remuneration of the investment adviser and the investment managers. Appendix 2 sets out the Trustees' policy towards risk appetite, capacity, measurement and management.

2. Investment objectives

The Trustees' primary objectives are to provide members with access to:

- an appropriate choice of assets for investment, reflecting the membership profile and the range of ways that members can draw their benefits in retirement; and
- a default investment option that the Trustees believe to be reasonable for those members that do not wish to make their own investment decisions. The objective of the default option is to generate returns significantly above inflation whilst members are some distance from retirement, but then to switch automatically and gradually to lower risk investments as members near retirement.

3. Investment strategy

The Trustees, with the help of their advisers and in consultation with the employer, last undertook a review of investment strategy in September 2023, taking into account the objectives described in Section 2 above.

The Trustees offer members a range of investment funds. Each member is responsible for specifying one or more funds for the investment of their account, having regard to their attitude to the risks involved. If a member does not choose an investment option, their account will be invested into the default option, which is managed as a “lifecycle” strategy (ie. it automatically combines investments in proportions that vary according to the proximity to retirement age).

The default option was designed in the best interests of the majority of the members based on the demographics of the Plan’s membership, and allocates assets to provide benefits to the individuals on whose behalf the contributions were paid. The default option targets cash withdrawals at retirement, since the Trustees believe that most members will wish take their benefits in this form. Therefore, the default option is initially invested in assets that have a relatively high expected return aiming for growth (equities), and then in the 10 years before retirement, it gradually switches into less risky assets, with the asset allocation at retirement being designed to be appropriate for members taking cash withdrawal.

To help manage the volatility that members’ assets experience in the growth phase of the default strategy, the Trustees have included an allocation to “diversified growth”, which over the long term is expected to generate equity like returns but with lower volatility than equities.

The objective for the default option is to provide a long term return in excess of inflation in the growth phase, and reducing volatility for members approaching retirement age.

The Trustees will review the default strategy and investment options at least every three years and as soon as practicable after any significant change in investment policy, or the demographic profile of relevant members. The Trustees will also monitor the relevant members’ behaviour to check whether assumptions made about how members will access their benefits are borne out in practice.

4. Considerations made in determining the investment arrangements

When deciding how to invest the Plan’s assets, the Trustees consider a number of risks, including, but not limited to, those set out in Appendix 2. Some of these risks are more quantifiable than others, but the Trustees have tried to allow for the relative importance and magnitude of each risk.

The Trustees considered a wide range of asset classes for investment, and the expected returns and risks associated with those asset classes as well as how these risks can be mitigated where appropriate.

In determining the investment arrangements, the Trustees also considered:

- the best interests of members and beneficiaries as a whole;
- the profile of the membership and what this implies for the choices members might make upon reaching retirement;
- the risks and rewards of a number of different lifecycle strategies and whether the return expected for taking any given investment risk is considered sufficient given the risk being taken;
- the need for appropriate diversification within the default strategy and other lifecycle options to ensure that, for each such option, both the overall level of investment risk and the balance of individual asset risks are appropriate;
- the need for appropriate diversification within the other investment options offered to members;

- any other considerations which the Trustees consider financially material over the periods until members' retirement, or any other timeframe which the Trustees believe to be appropriate; and
- the Trustees' investment beliefs about how investment markets work and which factors are most likely to impact investment outcomes.

The Trustees' key investment beliefs, which influenced the setting of the investment arrangements, are as follows:

- asset allocation is the primary driver of long-term returns;
- risk-taking is necessary to achieve return, but not all investment risks are rewarded with a risk premium;
- equity risk, credit risk and illiquidity are the primary sources of rewarded investment risk and hence the primary sources of long-term investment returns;
- risks that do not have an expected reward (ie a risk premium) should generally be avoided, hedged or diversified away;
- investment markets are not always efficient and there may be opportunities for good active managers to add value;
- the trustees consider environmental, social and governance ("ESG") factors when making investment decisions and the trustees believe that they could be one area of market inefficiency where managers may be able to improve risk-adjusted returns by taking account of ESG factors;
- the transition to a low carbon economy presents risks and opportunities for the Plan's investment returns. Mitigating the risks and seeking out the opportunities offers the potential to enhance the Plan's investment returns;
- however, investment managers who can consistently spot and profitably exploit market inefficiencies and opportunities are difficult to find and have higher fees and therefore passive management, where available, is usually better value for Members; and
- investment management costs and trading costs have a significant impact on long-term performance and therefore obtaining value for money from the investments is important.
- long-term net risk-adjusted investment returns may be improved by investing in illiquid assets. In line with this belief, we have previously tried to add an illiquid allocation to the default strategy, though were unable to do so due to operational constraints at the time. As a result, investments in the DC default arrangement do not currently include illiquid assets. However, with the support of our investment adviser, we intend to consider investment in illiquid assets when we next review the default strategy.

The Trustees' key investment beliefs and understanding of the Plan's membership are reflected in the design of the default and other lifecycle options, and in the range of other funds made available to members.

5. Implementation of the investment arrangements

Before investing in any manner, the Trustees obtain and consider proper written advice from their investment consultant on the question of whether the investment is satisfactory, having regard to the need for suitable and appropriately diversified investment.

Details of the investment managers, their objectives, investment guidelines, and custody arrangements are set out in the separate Investment Policy Implementation Document ("IPID").

The Trustees have an agreement with an investment platform provider, which sets out in detail the terms on which the investments are managed. This gives access to a range of funds managed by a variety of investment managers. The investment managers' primary role is the day-to-day investment management of the Plan's investments.

The Trustees and investment managers to whom discretion has been delegated exercise their powers to give effect to the principles in this Statement of Investment Principles, so far as is reasonably practicable.

The Trustees have limited influence over managers' investment practices because all the Plan's assets are held in pooled funds, but they encourage their managers to improve their practices where possible and where appropriate.

The Trustees' view is that the fees paid to the investment managers, and the possibility of their mandate being terminated, ensure they are incentivised to provide a high-quality service that meets the stated objectives, guidelines and restrictions of the fund. However, in practice managers cannot fully align their strategy and decisions to the (potentially conflicting) policies of all their pooled fund investors in relation to strategy, long-term performance of debt/equity issuers, engagement and portfolio turnover.

It is the Trustees' responsibility to ensure that the managers' investment approaches are consistent with the Trustees' policies before any new appointment, and to monitor and to consider terminating any existing arrangements that appear to be investing contrary to those policies. The Trustees expect investment managers, where appropriate, to make decisions based on assessments of the longer term financial and non-financial performance of debt/equity issuers, and to engage with issuers to improve their performance. They assess this when selecting and monitoring managers.

The Trustees evaluate investment manager performance by considering performance over both shorter and longer-term periods as available. Except in closed-ended funds where the duration of the investment is determined by the fund's terms, the duration of a manager's appointment will depend on strategic considerations and the outlook for future performance. Generally, the Trustees would be unlikely to terminate a mandate on short-term performance grounds alone.

The Trustees' policy is to evaluate each of their investment managers by reference to the manager's individual performance as well the role the Trustees play in helping the Plan meet its overall long-term objectives, taking account of risk, the need for diversification and liquidity. Each manager's remuneration, and the value for money it provides, is assessed in light of these considerations.

The Trustees recognise that portfolio turnover and associated transaction costs are a necessary part of investment management and that the impact of portfolio turnover costs is reflected in performance figures provided by the investment managers. The Trustees expect their investment consultant to incorporate portfolio turnover and resulting transaction costs as appropriate in its advice on the Plan's investment mandates.

6. Realisation of investments

The investment managers have discretion over the timing of realisation of investments of the Plan within the portfolios that they manage, and in considerations relating to the liquidity of investments.

The Trustees' policy is to invest in funds that offer daily dealing to enable members to readily realise and change their investments. With this in mind, the Trustees are open to exploring the addition of

illiquid assets to the default investment strategy at the next strategy review, but a key focus will be in ensuring that the fund remains able to offer daily liquidity for members.

7. Financially material considerations and non-financial matters

The Trustees have considered how social, environmental and ethical factors should be taken into account in the selection, retention and realisation of investments given the time horizon of the Plan and its members.

The Trustees expect their investment managers to take account of financially material considerations (including climate change and other ESG considerations). The Trustees seek to appoint managers that have appropriate skills and processes to do this, and from time to time review how their managers are taking account of these issues in practice.

The Trustees have limited influence over managers' investment practices where assets are held in pooled funds, but they encourage their managers to improve their practices where appropriate.

Assessing and managing climate-related risks and opportunities is entirely consistent with protecting the long term returns of the Plan and is therefore acting in the best long-term interests of the Plan's members.

Appointing managers that are committed to an efficient and effective transition to a low-carbon economy is an important means of facilitating good member outcomes.

The Trustees do not take into account any non-financial matters (ie matters relating to the ethical and other views of members and beneficiaries, rather than considerations of financial risk and return) in the selection, retention and realisation of investments for the default investment option. However, the Trustees recognise that some members may wish for ethical matters to be taken into account in their investments and therefore has made available the Ethical Fund as an investment option to members.

8. Voting and engagement

The Trustees recognise their responsibilities as owners of capital, and believe that good stewardship practices, including monitoring and engaging with investee companies, and exercising voting rights attaching to investments, protect and enhance the long-term value of investments and is in the best interest of members.

The Trustees have delegated to their investment managers the exercise of rights attaching to investments, including voting rights, and engagement with issuers of debt and equity and other relevant persons about relevant matters such as performance, strategy, capital structure, management of actual or potential conflicts of interest, risks and ESG factors.

As all of the Plan's investments are held through managers or pooled funds, the Trustees do not monitor or engage directly with issuers or other holders of debt or equity. They expect the investment managers to exercise ownership rights and undertake monitoring and engagement in line with the managers' general policies on stewardship, as provided to the Trustees from time to time, considering the long-term financial interests of the beneficiaries. The Trustees seek to appoint managers that can evidence strong stewardship policies and processes, reflecting where relevant the recommendations of the UK Stewardship Code issued by the Financial Reporting Council, and from time to time the Trustees review how these are implemented in practice.

The Trustees monitor managers' activities in relation to ESG factors, voting and engagement on a regular basis. They seek to understand how they are implementing their stewardship policies in practice to check that their stewardship is effective and aligned with their expectations.

The Trustees have selected some priority ESG themes to provide a focus for their monitoring of investment managers' voting and engagement activities (see the Implementation Statement for Plan Years to 31 March 2023 onwards). The Trustees review the themes regularly and update them if appropriate. They communicate these stewardship priorities and their more general expectations in relation to ESG factors, voting and engagement to the managers periodically.

If the Trustees' monitoring identifies areas of concern, the Trustees will engage with the relevant manager to encourage improvements.

Investment governance, responsibilities, decision-making and fees

The Trustees have decided on the following division of responsibilities and decision-making for the Plan. This division is based upon the Trustees' understanding of the various legal requirements placed upon them, and their view that this division allows for efficient operation of the Plan overall, with access to an appropriate level of expert advice and service. The Trustees' investment powers are set out within the Plan's governing documentation.

1. Trustees

In broad terms, the Trustees are responsible in respect of investment matters for:

- developing a mutual understanding of investment and risk issues with the employer;
- setting the investment strategy, in consultation with the employer;
- formulating a policy in relation to financially material considerations, such as those relating to ESG considerations (including but not limited to climate change);
- formulating a policy on taking account of non-financial matters in the selection, retention and realisation of investments;
- reviewing the investment policy as part of any review of the investment strategy;
- setting the policy for rebalancing between asset classes;
- setting a policy on the exercise of rights (including voting rights) and undertaking engagement activities in respect of the investments;
- putting effective governance arrangements in place and documenting these arrangements in a suitable form;
- appointing, monitoring, reviewing and dismissing investment managers, custodians, investment consultants and other advisors;
- monitoring the exercise of the investment powers that they have delegated to the investment managers and monitoring compliance with Section 36 of the Act;
- communicating with members as appropriate on investment matters, such as the Trustees' assessment of its effectiveness as a decision-making body, the policies regarding responsible ownership and how such responsibilities have been discharged;
- reviewing the content of this SIP from time to time and modifying it if deemed appropriate; and
- consulting with the employer when reviewing the SIP.

2. Investment platform provider

The investment platform provider will be responsible for:

- providing access to a range of funds managed by various investment managers;
- providing the Trustees with regular information concerning the management and performance of the assets; and
- having regard to the provisions of Section 36 of the Act insofar as it is necessary to do so.

3. Investment managers

In broad terms, the investment managers will be responsible for:

- managing the portfolios of assets according to their stated objectives, and within the guidelines and restrictions set out in their respective investment manager agreements and/or other relevant governing documentation;
- taking account of financially material considerations (including climate change and other ESG considerations) as appropriate when managing the portfolios of assets;
- exercising rights (including voting rights) attaching to investments and undertaking engagement activities in respect of investments;
- providing the Trustees and investment platform provider with regular information concerning the management and performance of their respective portfolios; and
- having regard to the provisions of Section 36 of the Act insofar as it is necessary to do so.

The custodians of the portfolios (whether there is a direct relationship between the custodian and the Trustees or not) are responsible for safe keeping of the assets and facilitating all transactions within the portfolios.

4. Investment consultant

In broad terms, the investment consultant will be responsible, in respect of investment matters, as requested by the Trustees, for:

- advising on a suitable fund range and default strategy for the Plan, and how material changes to legislation or within the Plan's benefits and membership may impact this;
- advising on the selection, and review, of the investment managers, incorporating its assessment of the nature and effectiveness of the managers' approaches to financially material considerations (including climate change and other ESG considerations); and
- participating with the Trustees in reviews of this SIP.

5. Fee structures

The Trustees recognise that the provision of investment management and advisory services to the Plan results in a range of charges to be met, directly or indirectly, by deduction from the Plan's assets.

The Trustees have agreed Terms of Business with the Plan's investment advisers, under which work undertaken is charged for by an agreed fixed fee or on a "time-cost" basis.

The investment managers and platform provider receive fees calculated by reference to the market value of assets under management. The fee rates are believed to be consistent with the managers' general terms for institutional clients and are considered by the Trustees to be reasonable when compared with those of other similar providers. See also Section 5 of the SIP.

The fee structure used in each case has been selected with regard to existing custom and practice, and the Trustees' view as to the most appropriate arrangements for the Plan. However, the Trustees will consider revising any given structure if and when it is considered appropriate to do so.

6. Performance assessment

The Trustees are satisfied, taking into account the external expertise available, that there are sufficient resources to support their investment responsibilities. The Trustees believe that they have sufficient expertise and appropriate training to carry out their role effectively.

It is the Trustees' policy to assess the performance of the Plan's investments, investment providers and professional advisers from time to time. See Section 5 of the SIP. The Trustees will also carry out periodically an assessment of their own effectiveness as a decision-making body and will decide how this may then be reported to members.

7. Working with the Plan's employer

When reviewing matters regarding the Plan's investment arrangements, such as the SIP, the Trustees seek to give due consideration to the employers' perspective. While the requirement to consult does not mean that the Trustees need to reach agreement with the employer, the Trustees believe that better outcomes will generally be achieved if the Trustees and employer work together collaboratively.

Policy towards risk appetite, capacity, measurement and management

The Trustees consider that there are a number of different types of investment risk that are important for the Plan. These include, but are not limited to:

1. Risk of inadequate returns

As members' benefits are dependent on the investment returns achieved, it is important that investment options are available which can be expected to produce adequate real returns over the longer term. Accordingly, equity funds and equity-based funds, which are expected to provide positive returns above inflation over the long term, have been made available to members and feature in the growth phase of the default strategy. To reduce the chance of a sharp deterioration in members' benefits close to retirement, the Trustees have made the default option a "lifecycle" strategy.

2. Risk from lack of diversification

This is the risk that failure of a particular investment, or the general poor performance of a given investment type, could materially adversely affect the Plan's assets. The Trustees believe that the Plan's default strategy is adequately diversified between different asset classes and within each asset class, and the investment options provide a suitably diversified range for members to choose from. This was a key consideration when determining the Plan's investment arrangements and is monitored by the Trustees on a regular basis.

3. Investment manager risk

This is the risk that an investment manager fails to meet its investment objectives. Prior to appointing an investment manager, the Trustees receive written advice from a suitably qualified individual, and will typically undertake an investment manager selection exercise. The Trustees monitor the investment managers on a regular basis to ensure they remain appropriate for their selected mandate.

4. Illiquidity/marketability risk

This is the risk that core financial transactions, such as investing members' contributions, are not processed promptly due to lack of liquidity in the investments. The Trustees manage this risk by only using pooled funds with daily dealing within the default strategy and diversifying the default strategy across different types of investment.

5. ESG risks

ESG factors are sources of risk to the Plan's investments, which could be financially material, over both the short and longer term. These include risks relating to factors such as unsustainable business practices and unsound corporate governance. Climate change is also deemed a financially material risk for the Plan. The Trustees seek to appoint investment managers who will manage these risks appropriately on their behalf and from time to time review how these risks are being managed in practice.

6. Risk from excessive charges

If the investment management charges together with other charges levied on, for example, transfers or early retirement are excessive, then the value of a member's account will be reduced unnecessarily. The Trustees are comfortable that the charges applicable to the Plan are in line with market practice and they regularly assess whether these represent good value for members.

7. Credit risk

This is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The Plan is subject to credit risk because it invests in bonds via pooled funds. The Trustees manage their exposure to credit risk by only investing in pooled funds that have a diversified exposure to different credit issuers. The Plan invests in some funds which invest in bonds that are classified as both "investment grade" and "non-investment grade" which carry greater credit risk.

8. Currency risk

Whilst the majority of the currency exposure of the Plan's assets is to Sterling, the Plan is subject to currency risk because some of the Plan's investments are held in overseas markets.

The Trustees consider the overseas currency exposure in the context of the overall investment strategy and believe that the currency exposure that exists acts to increase the diversification of the strategy.

9. Interest rate and inflation risk

The Plan's assets are subject to interest rate and inflation risk because some of the Plan's assets are held in money market instruments and bonds invested via pooled funds.

10. Other non-investment risks

The Trustees recognise that there are other, non-investment, risks faced by the Plan, and takes these into consideration as far as practical in setting the Plan's investment arrangements.
